

We currently have the following position to fill in Friedrichshafen:

## DevOps Engineer Aeronautical Solutions (m/f/d)

You will work in the integration team within the field of Air Traffic Management systems. As a DevOps Engineer, you will be responsible for complex applications and work closely with dedicated development and test teams. We work with the latest technologies such as container-based applications and microservices platforms and their orchestration with Kubernetes and OpenShift.

### Responsibilities:

- To ensure the operation of large scalable systems, apply software engineering principles.
- You automate recurring tasks while keeping things simple to shorten our release cycles.
- As part of a cross-functional team, you support our software engineers in keeping an eye on the processes in order to continuously improve the quality of our services.
- You independently set up test, QA and production environments together with the development teams, using infrastructure as code (IaC).
- Administrate and monitor kubernetes environments
- (Optional) Know-how with Kubernetes/OpenShift Operators

### Qualifications:

- Completed technical studies or comparable professional experience
- Several years of experience as a DevOps
- Good knowledge of Jenkins and the creation of pipelines for CI/CD
- Competent with containerization and orchestration (Docker, Kubernetes)
- Good general knowledge of Linux
- Optional: Knowhow mit OpenShift

### We offer:

- Flexible Hours and mobile working
- Personalized career advancement, training and development
- Work in international Teams
- Possibility to lease a bike - Jobrad
- Employment in the Lake Constance "Four-country-region" (Germany, Switzerland, Austria, Liechtenstein) with countless leisure and recreation possibilities
