

We are currently looking to fill the following position in Friedrichshafen:

DevOps Engineer Software Integration (m/f/d)

You will work in the software integration team within the field of Air Traffic Management systems. As a Software Integration Engineer, you will be responsible for complex applications and work closely with dedicated development and test teams. We work with the latest technologies on the way of transformation to container-based applications and microservices platforms and their orchestration with Kubernetes.

Responsibilities:

- Configuration and integration of internal and external software components for the delivery of systems in the Air Traffic Control environment
- Creation of software installation packages
- Software change and release management
- Management of integration and test environments
- Working with the development and testing teams

Requirements:

- Completed technical studies or comparable professional experience
- Several years of experience with Version Control systems and Change Management methods
- Hands on experience with the operating systems Linux (focus) and Windows
- Experience with relational databases and knowledge of SQL
- Basic knowledge of application development and application of development tools
- Analytical thinking skills and the ability to quickly familiarize oneself with new technologies and if requested take creative paths

We offer:

- Flexitime without core working time
- 30 days holiday
- Good work-life balance through mobile working
- Individual support with regular further training programmes
- Working in international teams
- Possibility to use Jobrad, Wellpass, corporate benefits
- Workplace in the four-country region on Lake Constance with attractive leisure opportunities
