Join us in building a visionary air traffic control business

Indra Avitech - Where air traffic control is a passion

To us, the development of global aviation solutions is more than just a job – it is a passion. And we are looking for motivated individuals to join us and share our enthusiasm for state-of-the-art air traffic control solutions. As a long-time pioneer, we feel committed to provide not only cutting-edge products and services for our clients, but also exceptional workplaces for our team, in which your individual skills and commitment can truly make a difference. In order to continue on our successful path, we are constantly looking for skilled and motivated individuals from all over the world to come on board and join us in shaping the aviation industry of tomorrow.

A multinational team providing cutting-edge aviation solutions around the world

Today Indra Avitech's future-oriented solutions are used by clients in more than 50 countries world wide. Our client base is constantly growing and includes civil and military air navigation service providers, government agencies, civil aviation authorities and airlines around the globe. Therefore, depending on your specific job, you will also have the opportunity of supporting our world wide customers at locations such as the new international airport in Dubai or Ottawa. Our workforce reflects our global international presence, and we have skilled employees from 20 different nations working together in close collaboration at our locations.

Ensuring safer & cleaner skies now and in the future

Indra Avitech's mission is to support the creation of a safer, cleaner, integrated civil and military Air Traffic Management System by supplying databases, tools, and processes to the aviation system. Air Traffic Control's key function lies in ensuring a safe separation between individual aircrafts and between aircrafts and obstacles during taxiing, take-off, en-route flight and landing. This is where environmental protection and economic efficiency go hand in hand, as efficient routing reduces total flight times, saves fuel and minimises pollution. Global satellite navigation systems are the backbone of this so-called ICAO Performance Based Navigation (PBN) concept, the implementation of which has the highest priority at the ICAO and is fully supported by Indra Avitech. If you share this vision of safe, efficient and environmentally friendly flying, you certainly should consider joining Indra Avitech.

Bratislava (Slovakia)

Where a pioneering spirit is truly in the air

Did you know that the area around Bodensee is one of the pioneering regions of modern aviation? This is from where Graf Zeppelin and Claude Dornier started their aviation success stories and today is a true aviation technology hub located in a beautiful and traditional landscape, where others go on holiday. The Dornier DO 24 seaplane began its successful world tour from here in 1930.

Friedrichshafen (Germany)

Exciting careers for smart people

Being a part of Indra Avitech means more than just developing and selling software products for aviation. Our professionals deal with the entire aeronautical data and aeronautical messaging systems lifecycle, from concept and requirements definition, to design process and software development, sales and customer support. Customer data migration, planning and supporting operational cut-over is also a part of our services. This means working in a multinational and enthusiastic team and discovering your individual career opportunities in the following areas:

- Software Development and IT-Services
- Project management
- Product Management
- Administration

Indra Avitech provides a range of career development opportunities, including personal development strategies and training courses to enable each individual to plan a future career with us. If you are interested in writing your Bachelor or Master thesis at Indra Avitech, get in touch with us!
