

## We currently have the following position available in Friedrichshafen, Germany

# Requirements Engineer (m/f/d)

### Responsibilities:

- Gather and analyze data to identify and document service/system requirements for aviation projects
- Work closely with stakeholders to understand and define business requirements and processes, ensuring that they align with project goals and objectives
- Manage the requirements traceability matrix to ensure that all requirements are traceable, testable and verifiable
- Develop and implement data-driven solutions to support decision-making, improve business performance and achieve strategic goals
- Collaborate with cross-functional teams to develop project plans and prioritize tasks, ensuring projects are completed on time and within budget
- Continuously monitor and evaluate industry trends and emerging technologies, and recommend new tools and methodologies to improve requirements management processes

### Requirements:

- Completed studies in Business Administration, Computer Science or related field
- 3+ years of experience in business analyst role, with focus on the aviation industry and requirements management
- Strong analytical and problem-solving skills with experience in service requirements and system requirements management
- Excellent written and verbal communication skills in English with the ability to communicate complex information to both technical and non-technical audiences
- Proven experience with project management methodologies (e.g. Agile, Waterfall) and tools (e.g. JIRA, Trello)
- Familiarity with requirements management tools (e.g. IBM DOORS, JIRA) and databases (e.g. SQL, NoSQL)

### We offer:

- Flexitime without core working time
- 30 days holiday
- Good work-life balance due to mobile working
- Individual support with regular further training programmes
- Working in international teams
- Possibility to use Jobrad, Wellpass, corporate benefits
- Workplace in the four-country region on Lake Constance with attractive leisure opportunities
