

We are currently looking to fill the following position in Friedrichshafen: **Test Engineer (m/f/d)**

Your Chance

You become part of an interdisciplinary product development team and you work close together with developers, product owners and customer project managers. You support the team to ensure our standard in developing high quality software products. You are led by curiosity and not afraid to try out new ways or ideas? Join our team and make your visions come true.

Your Scope

- Test automation and software testing is your mission and it is important for you to continuously enhance test automation in your team to deliver a working software every sprint
- You analyze and improve our test environment to ensure the high quality for our products by taking on responsibilities and presenting your own point of view in solution orientated discussions
- You create test plans, test specifications and test data for testing application software features derived from our product and customer requirements
- You perform software tests at our premises or at our customer sites and you create comprehensive test result reports
- You are keen on localizing defects and creating meaningful issue reports in close collaboration with the product development team

Your Qualification

- Completed studies in (business) computer science or a similar apprenticeship
- Structured and analytical thinking as well as an accurate method of operation together with a proactive approach and the capacity for teamwork
- Preferably some years of experience as a Software Test Engineer and knowledge of GUI and Web test automation tools
- Preferably experience with Git and a programming / scripting language like Python or Java.
- Experience in dealing with software and computer systems on different platforms (Windows, UNIX derivatives)
- Open personality, driving things, self-organized, pro-active, reliable, having a strong attitude to "getting things done" and very good knowledge of English

We offer:

- Flexible working hours and mobile working
- Personalized career advancement, training and development
- Work in intercultural teams
- Possibility to lease a bike – Jobrad
- Employment in the Lake Constance „Four-country-region“
